

We are looking for predoctoral candidates interested in cancer immunology and immunotherapy for a FPI contract associated to the project PID2020-113174RA-I00 that tries to investigate the immunomodulatory effects of neutrophils in cancer.

We look for FPI candidates that are reserve candidates for other FPI proposals only, as this contract is associated with a 2021-FPI project.

If you want to join a highly competitive research group in immunotherapy in Spain engaged in translational science and live imaging of the immune system please contact us in ateijeiras@unav.es.

Please send CV and bachelor grades.
