

WE OFFER YOU:

- ▶ To belong to a dynamic association that actively promotes and **defends research**
- ▶ To participate in multiple **scientific activities** and **professional updating courses**
- ▶ The access to **up-to-date information** on cancer research
- ▶ The access to **collaborations with scientists and networks** inside and outside of Spain
- ▶ To participate in **professional orientation and leadership** workshops
- ▶ To **participate in** ASEICA-Youth, ASEICA-Woman, ASEICA-Med or ASEICA-Aprende **working groups**
- ▶ **Tutoring** of young researchers in the ASEICA4You program
- ▶ The access to **prizes and research grants**
- ▶ The access to **reduced or free** registration to ASEICA activities
- ▶ **To be a member of EARC with no additional cost**

ASEICA

BRINGS TOGETHER BASIC, TRANSLATIONAL AND CLINICAL RESEARCHERS IN THE FIELD OF ONCOLOGY TO PROMOTE THEIR COOPERATION AND TO SUCCESSFULLY APPROACH THE FIGHT AGAINST CANCER

ASEICA, A REFERENCE IN RESEARCH AGAINST CANCER

The Spanish Cancer Research Association (ASEICA) was founded in 1983 and brings together more than 1,200 basic, translational and clinical researchers in cancer. ASEICA favors the interactions between its members and also with international colleagues, through organizing scientific activities. In addition, ASEICA is the voice of its members and their needs, from the point of view of their professional careers and the day-to-day work in research.

ASEICA promotes the establishment of new policies in the scientific and health systems of our country that, in the end, will favor better and more equitable ways for the diagnosis and treatment of cancer patients. All these activities are carried out with the conviction that research is essential for the progress of our country and to improve the survival and quality of life of patients.

We serve as a connection

through meetings, symposia and congresses. We collaborate with other Spanish and European scientific societies organizing and participating in different actions.

We influence Spanish R&D&i

through active advocacy and through expert support on issues that affect researchers and their professional development.

We support researchers

through visibility actions, networking, training and mentoring programs, and through our work groups: ASEICA-Youth, ASEICA-Woman, ASEICA-MED and ASEICA-Aprende.

“We work for more competitive cancer research that is closer to patients. Join us, join ASEICA”

OBJECTIVES:

- ▶ To be a **meeting point** for all **basic, clinical and translational scientists** working on cancer in our country
- ▶ To be a **proactive agent** in **decision-making** on **scientific policies and organizational strategies** of the **National Health System**
- ▶ **To claim** the **importance of research** to **improve** the **survival** and quality of life of **cancer patients**, and for the **economic development** of the country
- ▶ **To guide, to make visible and to defend** the work of **young scientists, emerging groups** and **female researchers** in our country
