ASEICA-WOMAN
VISIBILIZE AND PROMOTE
RESEARCHERS IN THE
AREA OF CANCER

TAKE ACTION!

Women represent more than 60% of the scientific personnel in this country; however, they are a minority in positions of high responsibility.

To face this issue, the Spanish Association for Cancer Research has set up the ASEICA-Women working group with the global objective of empowering female cancer researchers in Spain.

We work to contribute to the training of women scientists in all phases of their career, promoting their leadership capacity and acting as an agent of vindication and social change.

Our motto is **Take action!**

aseica
MUJER

OBJECTIVES:

To **promote the training and professional development** of female cancer researchers

To **make visible** the **work** and **successes** of women scientists in our country

To **promote R&D&i** policies aimed at reducing **gender inequality**

To serve as a **connection** between researchers in Spain and abroad

To **promote new scientific vocation**

CONÓCELAS: “The Cancer Detectives”

CONÓCELAS connects women researchers in Spain and abroad with primary, secondary and university students, with the aim of breaking gender stereotypes.

This interaction is carried out through online or face-to-face chats. Thus, students can discover the “women behind the lab coat.”

More than 11,000 students and 235 women scientists participated in the CONÓCELAS -2022 edition. If you are a member of ASEICA, you can join this community of leading women researchers.

If you are a student, or a teacher in an educational center, contact ASEICA to participate in new editions of CONÓCELAS. We wait for you.
